Minnesota
County Biological Survey*

Wetlands are assigned a 12-digit unique ID number in the 2007 Wetland Inventory, as follows:

To correlate information on this map to the wetland inventory, use the County, Township, Range, and Section number with the Map ID. The County, Township, & Range numbers are: 27 - 118 - 23. Section numbers and the Wetland Map ID are on the map.

DNR Mapped High Quality Natural Communities and Sites of Biodiversity Significance are areas identified by the MN DNR as having diverse and high quality or rare plant communities that are of county or regional significance, and in some cases, state-wide significance.

December 2007
